

1. Write a function to check whether a number is a palindrome.
2. Write a function to count the number of digits in a number.
3. Write a function to find the factorial of a number.
4. Write a function to check whether a number is prime.
5. Write a function to find the smallest digit in a number.
6. Write a function to find the largest digit in a number.
7. Write a function to count even and odd digits in a number.
8. Write a function to check whether a number is perfect.
9. Write a function to print Fibonacci series up to N terms.
10. Write a function to find the GCD of two numbers.
11. Write a function to calculate the LCM of two numbers.
12. Write a function to swap two numbers without using a third variable.
13. Write a function to find the second largest digit in a number.
14. Write a function to find the maximum occurring digit in a number.
15. Write a function to find the next palindrome number after a given number.
16. Write a function to reverse a string.
17. Write a function to check whether a string contains a given word
18. Write a function to count the number of words in a string.
19. Write a function to replace all spaces in a string with hyphens (-).
20. Write a function to count how many times a character appears in a string.
21. Write a function to find the longest word in a string.
22. Write a function to capitalize the first letter of each word in a string.
